

Enjoy Your
Favorite Lake
or Stream
in a

LINKANDOE

STURDY
KNOCKDOWN
LIGHT WEIGHT

The *perfect* Sectional Canoe

Easily stowed in the luggage compartment of your car.

Packed in the luggage compartment of your car or airplane, LINKANOE occupies approximately the same space as a couple of suitcases. Transportation on pack-horse to hard-to-get-at places is equally simple. The two balanced packs are adaptable to easy stowage and carrying under all circumstances.

With LINKANOE available you can enjoy to the fullest any waters you want to fish or explore. You can reach those hidden game haunts that may often lie behind miles of swamp or water-locked back-country.

Ready for Use in a Few Minutes

LINKANOE can be completely assembled ready for the water in ten minutes or less. It can be disassembled and packed in an even shorter time.

Light enough for easy handling and short portages. Paddles form a convenient carrying yoke.

For long drives to distant vacation spots

For family trips to favorite picnic places

For any lake or stream—wherever adventure calls

A Full-Size Guide Canoe

LINKANOE is a full-size guide canoe. In the water, it is perfectly balanced and, due to its perfected hull design, possesses more than average stability.

It is fast and easy to handle with either one or two paddles.

The seats are comfortable, accurately and conveniently located, and equipped with flotation pads.

The paddles are sectional and, when disassembled, the upper sections become convenient grips for carrying the two packs. Assembled and fastened to the thwart and bow seat, the paddles become carrying yokes for short portages.

Always Have It With You

LINKANOE is the answer to your outing problem. Pack a LINKANOE for uninterrupted convenience and pleasure wherever you go—be it mountain stream, lake, river, or bay.

Let the luggage compartment of your car or airplane serve as permanent storage space for your LINKANOE so that it will always be available when needed.

Stacked in special canvas cases, LINKANOE makes up into two convenient packs.

LINKANOE

Always Ready to Go...

on Water, Car, Airplane, or Packhorse

Each section and part of LINKANOE is precision made and rigidly inspected.

The hull is built in ten sections. Each section consists of a sheet of molded plastic riveted to a laminated wood frame. Rigid tests have proven that this plastic material is stronger than plywood and yet is sufficiently flexible to withstand rough handling. It is waterproof, non-absorbent, will not warp, and is impervious to salt water, oil, and gasoline.

The laminated wood framework for each section is also precision molded under pressure and will not warp, check, or split. It is finished in natural hardwood color and should never require refinishing, although a coat of spar varnish after a hard season tends to preserve its appearance.

No Tools Needed to Assemble

LINKANOE sections are firmly locked together over tongue and grooved joints with specially designed locking clamps. The clamps are attached permanently

to the sections, drop easily into place, and are locked by a slight blow with the flat of the hand. The clamps lie flat and do not obstruct the free use of the hull for any purpose.

In disassembling, the clamps are released with a special tip on the two fore and aft deck sections so that two people, working together, can take the craft apart and pack it in a very few minutes.

The locking clamps and all other metal parts are heavily plated and chrome finished.

LINKANOE Is Rigid and Strong

When assembled, LINKANOE is rigid and strong, and will withstand heavy loading or cruising shock without damage. A strong center thwart and fore and aft seats securely locked in position give adequate cross section strength.

Even on the limited space of an airplane wing, LINKANOE can be easily assembled. Weight and space requirements make it ideal for aviators.

LINKANOE is ready for the water in ten minutes or less.

LINKANOE is perfectly balanced and carries a heavy load with more than average stability.

Leather thongs at both bow and stern lace up in boot style for adjustment.

The sheath is a specially treated waterproof cover designed to give many years of satisfactory service. It is tough, durable, smooth fitting and specially reinforced along the keel line. It may be folded and packed along with the canoe sections in one of the carrying cases when not in use.

Small compartments located beneath both bow and stern decks afford convenient storage space for first aid kit and other small articles.

After assembling the hull sections, seats, thwart, and decks, the craft is turned over and the sheath dropped into place, pulled down smoothly and evenly. Airplane shock cord loops slipped over studs beneath the gunwales, secure the sheath in place and provide a pleasing and distinctive pattern.

LINKANOE can be equipped with oarlocks and oars, or with outboard motor and rudder. Under all conditions its excellent design makes for perfect performance.

If, through carelessness or unavoidable accident, any section or part of your LINKANOE is lost or damaged beyond repair, a new section or part can be supplied for replacement at a nominal cost.

Keep Your Eye on the Link Line

Keep your eye on the LINKANOE and the Link line of craft for new, modern designs in dinghys, rowboats, and small sailboats to be built of strong, durable, lifetime plastic.

Enjoy the many unexpected opportunities for boating and fishing in your own craft, especially at those places where boats are otherwise unavailable.

Always Have LINKANOE With You

Equipped with oars, LINKANOE is a speedy stable craft.

LINKANOE

Full Size and Full Capacity

Assembled, LINKANOE is 14½ feet long with a 35-inch beam. It is a full-size guide canoe, designed to give satisfactory service under the toughest kind of usage.

In addition to its sturdy construction and ability to carry a full load, LINKANOE is fast and easy-handling. Gunwales are narrow and the water is easily reached from either seat by a small person.

LINKANOE is a *must* in any all-around sportman's equipment. It's just the craft for a sports-loving family. With LINKANOE in your car or plane, inviting waters lead only to new adventures and a full day's sport.

Modern, streamlined, trim—a truly beautiful craft.
