

"Let's Go
Canoeing"

THE fascination of canoeing is redoubled when one knows that in appearance and construction the canoe that he is in, is without a superior. It is not possible in this space to go into details regarding the skillful construction and striking beauty of the Mullins Canoe. There's a Mullins Canoe Catalog showing all of the models in actual colors, which you may have for the asking.

Meanwhile, here are a few illustrations accompanied by prices. In considering price and appearance together, please remember that while the price speaks for itself, it is impossible to reproduce by photograph, the beauty and many excellent features of the Mullins line of canoes.

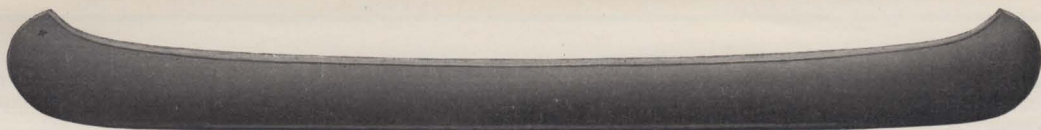

Mullins Canoe Equipped with Lateen Sail and Lee-Boards

Mullins canoes when equipped with buoyancy pads are unsinkable. Every Mullins Canoe is beautifully finished, light in weight, speedy and very durably built.

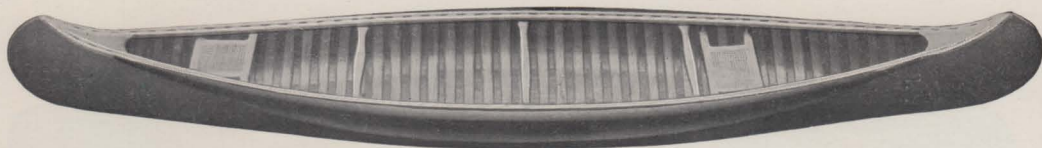

A Mullins Canoe will double your pleasure in the big outdoors.

MULLINS CANOES

SIDE VIEW

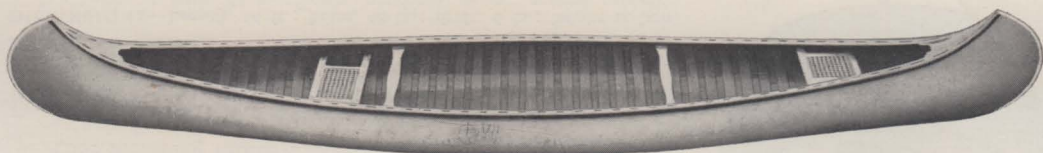

The Mullins Improved Charles River Model is built in three lengths—the 16-foot "YALE"—the 17-foot "PRINCETON" and the 18-foot "HARVARD," all furnished in two grades—the Standard and the I. X. L.

Mullins Cedar Canoes Are Used Around the World

WE manufacture where others build. Statistics show that a vast majority of all canoes sold are of a certain model and confined to two or three lengths only. By adopting the Improved Charles River model and producing it in 16 ft., 17 ft., and 18 ft. sizes, cost of production is reduced to the

minimum. MULLINS Canoes are all open gunwale type and fitted with keel at no additional charge, heavy brass bang plates protecting stems.
